

Semi-annual Management Report of Fund Performance

As at March 31, 2022

This Semi-annual Management Report of Fund Performance contains financial highlights but does not contain either semi-annual or annual financial statements of the investment fund. You can obtain a copy of the semi-annual or annual financial statements at your request, and at no cost, by calling 1-888-809-3333, by writing us at Northwest & Ethical Investments L.P., 151 Yonge Street Suite 1200, Toronto, ON M5C 2W7 or by visiting our website at www.neiinvestments.com or SEDAR at www.sedar.com.

Unitholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Performance

Results of Operations

The NEI ESG Canadian Enhanced Index Fund's Series A units returned 9.3% for the six months ended March 31, 2022 compared with a return of 10.6% for the benchmark explained below.

Unlike the benchmark return, the Fund's returns are after the deduction of fees and expenses paid by the Fund. Performance differences between series of units are mainly attributable to management fees charged to each series. Refer to the Past Performance section for the details of returns by series.

The benchmark for this Fund is the Solactive Canada Broad Market Index.

The Fund's net asset value increased by 11.94% during the period, from \$296,889,662 as at September 30, 2021 to \$332,330,322 as at March 31, 2022. This change in net assets is attributed to net unitholder activity of \$5,030,573 and \$30,410,087 to investment operations, including market appreciation (depreciation), income and expenses.

Factors That Have Affected Performance

For the six-month period ending March 31, 2022, markets were rocked by volatility ending the period just a notch higher. Despite the Omicron variant and elevated inflation, equities initially rose into the end of the 2021 on the backdrop of strong corporate earnings. The sentiment quickly turned in the new year as headline inflation continued rise to multi-decade highs and developed economy central banks expressed interest in taking on a more aggressive stance in response. Developed economy central banks accelerated their pace of monetary tightening, looking to end quantitative easing earlier than previously anticipated with some kicking off their rate hike cycle. Investor sentiment took a another hit as Russia initiated its invasion of Ukraine, further increasing inflation pressures as the region is a large exporter of agriculture and energy. Central banks are caught in a dilemma as economic projections forecast lower growth and higher inflation. Global equities managed to post positive returns as earnings forecasts continued to steadily climb even as inflation and bond yields surged. The MSCI World (C\$) returned 0.78% while the Bloomberg Barclays Global Aggregate (C\$ Hedged) returned -4.92% during the period.

The Bank of Canada wrapped up its quantitative easing asset purchase program, moving it to a reinvestment phase where it would no longer expand its bond holdings, and raised rates for the first time in March since the onset of COVID by 25 basis points to 0.50%. Coronavirus restrictions from the Omicron variant were eased at the end of January. The unemployment rate fell to 5.5% already lower than the 5.7% reading pre-pandemic February 2020 and combined with elevated inflation gave the Bank of Canada confidence to hike rates, hinting that more would come in order to tame inflation. Canadian equities were among the strongest performers for the period as commodity prices surged on shortages due to the rapidly reopening global economies and the Russia-Ukraine war breaking out. The S&P/TSX Composite returned 10.54% and the FTSE Canada Universe Bond returned -5.60%.

In the U.S., the Federal Reserve became increasingly anxious as inflation surged to multi-decade highs. The Fed meeting minutes revealed growing concerns amongst members, to which the Fed announced it was accelerating the rate of the tapering of its asset purchase program. The focus has clearly shifted to the stable price component of the Fed's dual mandate as inflation pressures mount as Fed Chairman Jerome Powell said that U.S. labour market conditions were consistent with maximum employment. The Fed "dot plot" projections saw median projections rise to seven hikes for the year of 2022 and treasury yields soared. The S&P 500 (C\$) returned 4.43% over the period and the Bloomberg Barclays U.S. Aggregate (C\$ Hedged) returned -5.93%.

Over the period, the exclusion of TC energy and underweight to Lightspeed Commerce added value. On the other hand, the underweight to Constellation Software and overweight to Shopify detracted value.

Recent Developments

Inflationary pressures have remained stubbornly persistent, moving consumer price indices to multi-decade highs in many regions around the world. Inflation was previously expected to peak in the second quarter of the year, but that may no longer be the case anymore as commodity prices surged as the Ukraine-Russia conflict escalated as Russia initiated an invasion and supply chain disruptions further intensify as China faces widescale lockdowns in face of a renewed wave. Growth projections on the other hand are waning in face of these headwinds. Nonetheless, central banks have pinpointed elevated inflation as the more pressing matter and investors are bracing for higher interest rates. The odds of a recession have no doubt risen, but a recession itself looks unlikely at this time. The underlying economy looks strong with the labour market continuing to post robust gains and corporate earnings continuing to hold strong. That stated, uncertainty is definitely elevated, and as we are still early in the rate hike cycle we expect more volatility to come in the months ahead.

In Canada, the month of March saw indoor capacity limitations lifted and vaccine requirements are now at the discretion of each business and not federally mandated. Travel requirements are also becoming more open. These measures being lifted will lead to increases in jobs and with that likely spending as well, both of which could further drive inflation higher. However, Omicron has shown that route to reopening is not simple and that going forward the path is likely going to have some setbacks. Canadian employment indicators will be key to watch in coming months, and will likely dictate central banks' appetites for interest rate hikes. Continued strong readings could reinforce the notion of 50 basis points hikes to come at future meetings. As of the end of March, markets are pricing as many as eight more hikes to come (25 bps each), which already means that there are multiple 50 bps hikes priced in, but watch for strong job numbers to confirm these expectations.

The U.S. Federal Reserve's latest Summary of Economic Projections saw 2022 growth expectations revised down to 2.8% from 4.0%, while inflation expectations gauged by personal consumption expenditures rose to 4.3% from 2.6%. Despite the slowing growth, the Fed dot plot, which reflects Fed officials' outlook for the Fed Funds Rate, saw the median projection rise to seven hikes for 2022, compared to just three hikes previously forecasted in December. This mounting inflation has the Fed seeing the need for rates to increase above the neutral rate over the next two years in order to counter these elevated levels of inflation, as the Fed looks towards a soft landing for the economy as it looks to tame inflation.

Related Party Transactions

Northwest & Ethical Investments L.P. ("NEI LP") is the Manager, Trustee, Portfolio Manager and Registrar of the Fund. Northwest & Ethical Investments Inc., the general partner of NEI LP, is a wholly-owned subsidiary of Aviso Wealth Inc. ("Aviso"). Aviso is also the sole limited partner of NEI LP. Aviso is a wholly-owned subsidiary of Aviso Wealth LP, which in turn is owned 50% by Desjardins Financial Holding Inc. and 50% by a limited partnership owned by the five Provincial Credit Union Centrals and The CUMIS Group Limited. Desjardins Financial Holding Inc. is a wholly-owned subsidiary of the Fédération des caisses Desjardins du Québec ("Fédération").

NEI LP charges the Fund a fixed administration fee in place of certain variable expenses. NEI LP in turn, pays all operating expenses of the Fund, other than specified fund costs (e.g. the fees and expense of the Independent Review Committee ("IRC"), taxes, and brokerage commissions) which include payments to related parties. These services are in the normal course of operations and are measured at an exchange amount that is consistent with other independent parties. Desjardins Trust Inc. ("Desjardins Trust") is the custodian of the Fund. Desjardins Trust is a wholly-owned subsidiary of the Fédération. The Fund may engage in securities lending and repurchase transactions, and Desjardins Trust may act as the Fund's securities lending and repurchase transactions agent ("Agent"). Any revenue earned on such transactions is split 60%—40% between the Fund and the Agent. Desjardins Securities Inc. ("DSI") is a broker responsible for security transactions on behalf of the Fund. DSI is wholly-owned subsidiary of the Fédération.

The Fund's sub-advisors may place a portion of their fund transactions with brokerage firms which are affiliates of NEI LP, provided that the affiliate's trade execution abilities and costs are comparable to those of non-affiliated qualified brokerage firms.

The Fund is distributed through Credential Asset Management Inc., Credential Qtrade Securities Inc., and members of the Desjardins group and other nonrelated parties by way of shared ownership. NEI LP pays to these parties distribution and servicing fees based on a percentage of the daily values of the units of each held by the dealer's clients and additionally, in some cases, on the amount of initial purchase.

NEI LP has established the IRC for the Fund in accordance with the requirements of National Instrument 81-107 – Independent Review Committee for Investment Funds in order to review conflicts of interest as they relate to investment fund management. The Fund did not rely on an approval, positive recommendation or standing instruction from the Fund's IRC with respect to any related party transactions.

This document contains forward-looking statements. Such statements are generally identifiable by the terminology used, such as "plan", "anticipate", "intend", "expect", "estimate", or other similar wording. These forward-looking statements are subject to known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market and business conditions; fluctuations in securities prices, fluctuation in interest rates and foreign currency exchange rates; and actions by governmental authorities. Future events and their effects on the Fund may not be those anticipated by us. Actual results may differ materially from the results anticipated in these forward-looking statements. We do not undertake, and specifically disclaim, any obligation to update or revise any forward-looking information, whether as a result of new information, future developments or otherwise.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ending March 31, 2022 and the past five fiscal years or for the periods since inception, as applicable.

Net Assets per Unit (\$) ⁽¹⁾

(1) All per unit figures presented in 2022 are referenced to net assets determined in accordance with IFRS and are derived from the Fund's semi-annual financial statements for the period ended March 31, 2022.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash or reinvested in additional units of the Fund.

(4) Distributions (if any) that may have been made that included return of capital in excess of short term earnings were made to minimize disruption and provide stability to investors who have elected to take their distributions in the form of cash, and as disclosed in the Simplified Prospectus. These amounts are reviewed at each calendar year-end and management engages in discussions with the sub-advisor to determine the most applicable strategy on a go forward basis and will take any action(s) as needed for the long term stability of the Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs, as well as withholding taxes) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(2) The trading expense ratio represents total commissions and other Fund transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(3) The portfolio turnover rate indicates how actively the Fund's sub-advisor manages its investment holdings. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

(4) The Fund changed the fiscal year end date from December 31 to September 30. Expense ratios for period ended September 30, 2019 reflect nine-month reporting period from December 31, 2018 to September 30, 2019.

Management Fees

The Manager is responsible for the management, supervision and administration of the Fund. The Manager receives from the Fund management fees, before HST, calculated daily on the net asset value of the Fund at an annual rate shown below. The Fund does not pay management fees for Series I and O units. Series I and O unitholders pay a negotiated fee directly to NEI Investments.

The management fee covers the cost of investment advisory fees, sales, marketing, and distribution expenses of the Fund. In addition, the Manager may pay a trailer fee to dealers out of this management fee. The trailer fee is a percentage of the average daily value of the units of the Fund held by the dealer's clients. No trailer fees are paid in respect of any Series F and PF units of the Fund.

The following table shows the major services paid for out of management fees as a percentage of the management fee for all applicable series of the Fund:

	Management Fee (%)	Investment Advisory and Other Fees (%)	Trailer Fee (%)
Series A	1.40	37.43	62.57
Series F	0.40	100.00	N/A
Series P	1.30	23.07	76.93
Series PF	0.30	100.00	N/A

Past Performance

The performance information provided will not necessarily indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the periods shown were reinvested in additional units of the relevant series of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following charts show the annual performance for each series of units of the Fund for each period shown and illustrate how the Fund's performance has varied from period to period with the exception of 2022, which shows the six-month return for the period ended March 31, 2022. The charts indicate how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.
